CL250BF
Rim Mounted Bluetooth Deadbolt

Our Smart Door Lock is a Keyless Digital / Electronic Door Lock which can be fitted as a Front Door Lock. It can be operated via Bluetooth or from remote locations using the TTLock iOS/Android app without the need for Internet or WiFi. It is suited for Homes, Offices, Airbnb, Motels, Holiday Homes etc.

The CL250BF has a 50mm back set. Slight modification enables the lock to fit in place of a Lockwood 001 or existing rim mounted locks. The versatility of the smart lock enables you to have greater control whilst being convenient and easy to manage. Not only does this increase your security, it also enables you to have greater peace of mind.

1. APP Installation and Registration

1.1. Download the "TTLock" App form Google play store or Apple store.
1.2. Install and register an account with your phone number or email.

> Note: The APP only supports Android 4.3 / IOS7.0 version and above. Once you pair a device with your phone/account, the device will not be able to link to other accounts, unless you remove the link from the App.

2. APP Connection

2.1. Turn on the Bluetooth on your phone.
2.2. Open the APP. Then click "Add Lock" and "Lock".
2.3. Touch the touch screen button of the smart lock to activate lock, the number keys indicator light will be bright and Click "Next" on the APP.
2.4. Find the smart lock name which starts with "xx_xxx" and click "+".
2.5. Rename the name of smart lock and click "OK", then Click "Finish".

> Note:
> (1) If you do not see the + sign, it means that that device has already been paired with another phone / account and cannot be linked to your phone. You will need the previous owner to remove the device from the account or transfer control of the device to your account. Also, remember that your phone must be connected to the internet (3G / 4G / Wifi) when ADD / LINK a new device.
> (2) Remove a Bluetooth Admin: Press and hold the reset button on the back panel of the lock, the lock will indicate "Please input initialization passcode", then enter "000#" on the keypad, the lock will be indicate "deleting administrator successfully", which means the lock has been restored to factory defaults after initialization.

3. APP Operation Instruction

3.1. Send eKey
   eKey is a function for you to authorize the Admin rights to other members, who has download the same APP in their own phones.All the people who holds can control the smart lock.
3.2. Generate Passcode
   The passcode receiver can unlock the smart by entering the passcode manually. The passcode can be set as different type:Permanent /Timed / One-time(6 hours) /Erase (24 hours) / Customized / Recurring . All passcodes generated can be sent to those in need by mail and chatting tools.
