CL-BTG3POE

Intelligent Bluetooth Gateway

The G3 PoE Intelligent Bluetooth Gateway (with Power over Ethernet) allows access to various features of "TTLock" enabled locks without needing to be in Bluetooth range of the lock. By installing the gateway, the locks are able to be controlled using Wi-Fi and the internet.

The device can be powered by an included USB-C cable or using Power over Ethernet via an ethernet cable.

PoE allows a single cable to both power and send data to the gateway. This makes the gateway ideal for mounting in a hotel/apartment hallway. (PoE enabled network switch required)

In order for the gateway to function correctly, it needs to be within 10 metres of the Bluetooth locks you wish to control. (Solid walls may impede Bluetooth signals)

The gateway allows for custom codes to be added/deleted remotely. This can be useful for landlords, Airbnb hosts, & many other users. It also gives an audit trail & push notifications when users lock or unlock doors.

Features

- Remote Lock/Unlock (disabled by default)
- Real Time Audit Trail
- Push Notifications
- Add/Delete Passcodes/eKeys
- Lock Setting Editing
- Lock Clock Changes
- Monitor Lock Status

Specifications

- Voltage - DC 5V/500mA
- Dimensions - 70 x 70 x 25mm (L x W x H)
- Weight - 53g NET, 120g Gross
- 10m Max Bluetooth Range
- Powered via USB-C or Power over Ethernet

Works with

Google Home/Nest & Amazon Alexa

**TTLock Available
on iOS & Android**
