USING THE SMART WIRELESS KEY REMOTE

SMART ACCESS

The smart wireless key remote is the ultimate solution for unlocking your smart lock with ease and convenience. With a range of up to 8 metres, you can unlock your smart lock from a distance, saving you time and hassle. This remote is designed to work seamlessly with our latest products in our SecEsafe smart lock range.
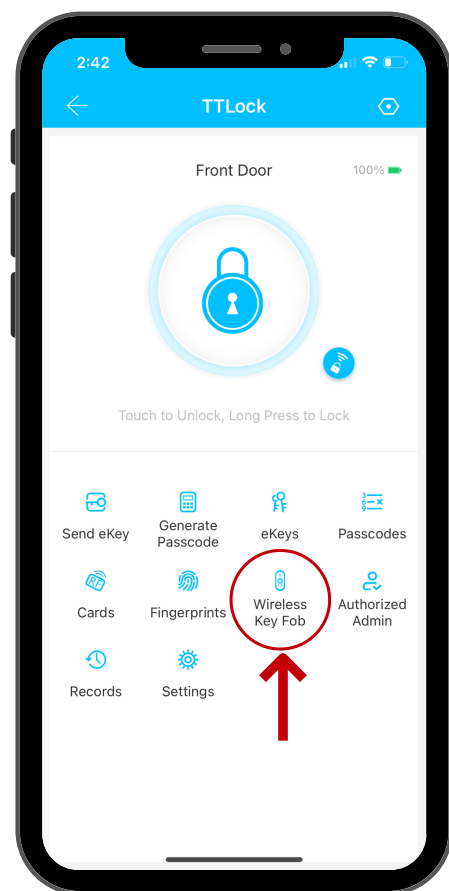

Create efficient unlock processes in personal and commercial settings without struggling to find your phone or keys to unlock your door and embrace the simplicity of our smart wireless key remote.

COMPATABILITY

IMPORTANT: PLEASE READ

Be sure to check that your smart lock is compatible with this new product.

1) You can do this by going into the smart lock on the TTLock App.

2) On the home page of the lock, check to see if the 'Wireless Key Fob' icon is available.

3) If so, this means that your lock is compatible with the smart remote. Unfortunately, older versions are not compatible with this new technology.

OPERATING THE SMART WIRELESS KEY REMOTE

OPERATION

STATUS LIGHT: WILL FLICKER WHEN PROMPTED TO LOCK/UNLOCK

LOCKING: PRESS THE LOCKING KEY TO LOCK, THE STATUS LIGHT WILL FLICKER TO INDICATE ACTION

UNLOCKING: PRESS THE UNLOCKING KEY TO UNLOCK, THE STATUS LIGHT WILL FLICKER

LOW POWER: THE STATUS LIGHT WILL FLICKER SLOWER THAN NORMAL ON THE UNLOCK/LOCK ACTION TO INDICATE LOW POWER

**Be sure to insert CR2032 battery prior to conducting the following steps*

GENEROUS OPERATING DISTANCE

The smart wireless key remote can operate between 5-8 metres from the smart lock. This means that you no longer have to be physically in front of the lock. Unlock your door with a click of the button for convenience.
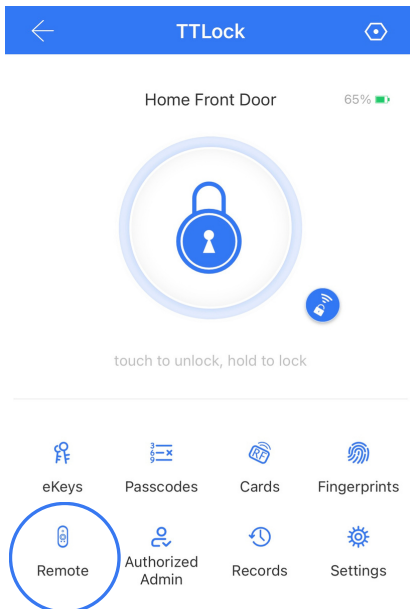

USING THE SMART WIRELESS KEY REMOTE

STEP 1

Open "TTLock" and select the lock you wish to add the wireless smart remote to.

SETTING UP THE SMART WIRELESS KEY REMOTE

TIPS & TRICKS

The smart wireless key remote is a great addition to your smart lock set. This smart remote provides a convenient entry method. Whether it be to unlock your garage from the comfort of your car or unlock the front door of a reception whilst at your desk, this smart remote is a great addition for a variety of environments.

Please Note:

- The Same remote key can be configured/paired with multiple locks so you don't have to carry multiple keys for each lock.
- The remote works on Bluetooth range. As a result, a G2 or G3 gateway is not necessary to operate remote.
- Required battery, **CR2032** is **not included** in purchase.
